### Blood Bank Refrigerators

4°C Refrigerators

### Plasma & Biomedical Freezers

-30°C / -40°C Freezers

### TwinGuard Freezers

-86°C Ultra-low Freezers

### Robust design for safest storage of whole blood

- Liquid-loaded monitor bottles designed to mimic the shape and thermal properties of blood bags.
- Stable temperature control.
- Designed to minimise cold-air loss, even with frequent door openings.
- Certified as a Class IIa Medical Device.

# The ideal freezing environment for the preservation of fresh frozen plasma

- Low running costs.
- More efficient cooling due to a high latent heat of evaporation.
- Direct cooling system for uniform temperature control.
- Full-height storage containers on each shelf.
- Double outer doors.
- Low environmental impact.

# The safest ultra-low temperature freezers for the storage of high value samples

- Dual Cooling refrigeration system for ultimate sample protection.
- Intelligent 'ECO mode' operation results in lower running costs.
- Vacuum release port for improved accessibility.
- VIP PLUS insulation: technology that maximises storage capacity.
- Quiet operation.
- User-friendly filter-less design.

### Cryogenic Freezers

-150°C Cryogenic Freezers

### **Cooled Incubators**

Wide temperature range

### CO<sub>2</sub> Incubators

Incubators from 49 litres to 851 litres

# The most uniform storage temperatures for cryopreservation solutions

- No cross contamination.
- Safe and convenient usability.
- Specially designed cascade refrigeration system.
- Standard LN<sub>2</sub> back-up.
- Low operational costs.
- Convenient control with LCD panel.
- Saves costs on LN<sub>2</sub>.

#### All-round performance

- Prevention of media drying because of unique fan positioning.
- Programmable operation.
- Wide temperature range from -10°C to +60°C with excellent uniformity.
- Precise temperature control for accurate, repeatable conditions.
- Comprehensive alarm system.
- · Glass door.

### Optimising cell culture outcomes and reproducibility

- Integrated shelf-supports.
- Full-colour LCD touch screen.
- USB port.
- Excellent control of CO<sub>2</sub> and temperature.
- Dew stick prevents condensation.
- Removable, easy-to-clean, humidifying pan.
- Certified as a Class IIa Medical Device.

## MBR Blood Bank Refrigerators

MBR Blood Bank Refrigerators provide the ideal +4°C environment for safe and reliable storage of whole blood. These are designed to create stable, reliable temperature control pre-set to 4°C with precise top-to-bottom temperature uniformity. The refrigerators feature a highly efficient refrigeration system that provides superior temperature recovery, rapid cooling, and quiet performance.

#### STABLE TEMPERATURE CONTROL

Temperature is controlled by two sensors located in the liquid-loaded monitor bottles, which are in the shape of a blood bag.

- Two thermistor sensors for constantly monitoring the temperature in both the upper and lower part of the chamber.
- Microprocessor control ensures the most accurate temperature control available.
- Multi air-flow plenum system ensures excellent temperature uniformity in larger capacity models. (MBR-704GR, MBR-1405GR).
- Temperature-maintained defrost, designed with thermal sensors and heaters on the evaporator.

#### MEDICAL DEVICE DIRECTIVE

PHCbi's MBR-305GR-PE and MBR-705GR-PE Blood Bank Refrigerators are certified as a Class IIa Medical Device (93/42/EEC and 2007/47/EC) for medical purposes.

#### TEMPERATURE VARIATIONS PREVENTED

MBR series are designed to minimize cold air loss even with frequent door openings.

- Seperated transparant inner doors minimize the chamber air leakage during door openings.
- Foamed-in-place insulation in the walls and magnetic sealed outer doors with double-pane glass window prevent chamber air leakage.
- Large air circulation fan enables rapid temperature recovery after door openings.

#### **USER FRIENDLY DESIGN**

- Selectable storage system to suit user needs.
- Fluorescent interior lamp with ON/OFF switch and a large view window in the outer door provide a clear view of stored items.
- Digital display is easy to see, and can be calibrated through the control panel.

#### ALARM AND SAFETY FUNCTIONS

To ensure the safety of critical blood supplies MBR series provide the following safety functions.

- Audible and flashing LED visual alarms with remote alarm contacts, in the event of power failure, high or low temperature condition, or due to thermal sensor abnormality.
- Door alarm and key lock are standard features.
- Re-activating buzzer, lamp and remote alarm contact. (30min. after buzzer stops).
- Built-in temperature recorder.

#### Audible and flashing LED Visual alarms

Audible and flashing LED visual alarms with remote alarm sounds, in case of power failure, high or low temperature condition, or during any thermal sensor abnormality.

#### Stable Temperature Control

Two thermistor sensors constantly monitor the temperature in both the upper and lower part of the chamber. The sensors are located in the liquid loaded monitor bottles, which are in the shape of a blood bag to accurately simulate product temperature.

#### Insulated windows

Insulated window prevents condensation and ensures temperature uniformity.

#### Interior Lamps

Fluorescent interior lamp with ON/OFF switch and a large view window in the outer door provide a clear view of stored items.

In the Biomedical field they provide effective storage of critical and high value supplies, samples, reagents and test kits.

### ADJUSTABLE SHELVES (MPR-721/1411)

The shelves can be arranged to accommodate all types of samples. The "R" models are fitted with pull-out drawers. With a profile of 100mm and 530mm front to back, these drawers are deep enough to hold large bottles or reagent kits.

#### POWERFUL REFRIGERATION

To cope with frequent door openings, Pharmaceutical refrigerators are equipped with powerful, hermetically sealed compressors.

### STANDARD ALARM & SAFETY FEATURES

Pharmaceutical refrigerators are fitted with buzzers and flashing lights to warn of high and low temperature problems. In the event of an irregular rise in cabinet temperature, the heater automatically shuts off and forced air circulation brings the temperature down.

#### TEMPERATURE STABILITY

PHCbi's temperature control system with thermistor monitor and microprocessor control reliably maintains cabinet temperature at the set level and is unaffected by ambient temperature. Forced air circulation ensures that the cabinet temperature returns to the set point quickly after door openings.

Model: MPR-721-PE

### Dedicated storage for biomedical samples

### HFC REFRIGERANT & CFC FREE INSULATION

PHCbi biomedical equipment is designed for low environmental impact. The MPR-721 and 1411 series use HFC refrigerant, and the foamed-in-place insulation is also CFC free.

#### LARGE FANS

The 120mm diameter fan ensures an even temperature throughout the cabinet (MPR-1411/R models have a double flow system with two fans). Heat spots from powered test apparatus are minimized and pulldown characteristics after door openings are outstanding.

1 Adjustable shelves
(MPR-721/1411)
The height adjustable
shelves can be arranged to
accommodate a variety of
sample types and
specimen racks.

Drawer type (MPR-721R/1411R) The "R" models are fitted with pull-out drawers. With a profile of 100mm and 530mm front to back, these drawers are deep enough to hold large bottles or reagent kits. They also allow convenient, space-efficient storage and management of patient medications and other items.

#### MICROPROCESSOR CONTROLLED

An electronic sensor accurately monitors chamber temperature and feeds the information to the microprocessor for precise control at preset temperature. Fans ensure gentle air circulation to provide uniform top to bottom temperature control after frequent door openings. PHCbi's easily calibrated, reliable and stable controls make validation easier.

#### **ERGONOMIC DESIGN**

The ergonomic design of the MPR series pharmaceutical refrigerators provides a clear view of stored items through the large framed windows.

The slim profile allows for easyreach retrieval of your products. Users can choose from two types to suit their needs; one with all wire shelves or one with sliding racks on one side.

### Safe and reliable sample storage

#### Visual LED Alarm Alerts

Audible and flashing LED visual alarms alert you to the unlikely event of either a high or low temperature condition. An over-shooting prevention circuit automatically switches off the fan motor or heater, if the inside temperature rises abnormally.

#### Easy to read digital display

Temperature readings are displayed in gradients of 1°C for configurable temperatures ranging from 2° to 14°C.

#### **Cabinet Construction:**

View window door design with protective film for safety. Key locked doors. Black out glass design is optional.

### Plenums Direct Airflow:

PHCbi's plenum design features uniform cold air flow distribution throughout the chamber to ensure temperature uniformity – essential for validated storage requirements.

Model: MPR-514R-PE

### Biomedical ECO -40°C Plasma Freezer

The MDF-U5412H-PE provides an ideal freezing environment for the preservation of blood plasma, vaccines, test samples, and other biological specimens. The Biomedical Eco Series freezers with natural refrigerants minimise energy consumption, reduce environmental impact and save money while providing superior stability and uniformity. A comprehensive alarm system and Class IIa Medical Device Certification ensure this freezer provides unsurpassed reliability and sample security.

The MDF-U5412H-PE is certified as a Class IIa Medical Device (93/42/EEC and 2007/47/EC) for medical purposes of storing cells, DNA and/or frozen plasma (For EU countries only)

#### LARGE STORAGE CAPACITY

• 300ml Fresh frozen plasma bag x 280 pieces.

### RELIABLE SAMPLE SECURITY

- A comprehensive visual and audible alarm system with remote alarm contacts ensures users are aware of any abnormalities and can take appropriate actions.
- Self-diagnostic system.
- Standard door lock allows a padlock to be fitted for extra security.
- An access port allows external temperature monitoring with the use of a probe, or an optional temperature chart recorder can be added.

### STABLE & UNIFORM TEMPERATURE DESIGN

- Double outer doors.
- Full-height storage containers on each shelf.
- Cooling tubes under every shelf.
- Direct cooling system for uniform temperature control.
- Manual defrost ensures a stable environment with no large temperature.

### NATURAL HYDROCARBON (HC) REFRIGERANTS

- More efficient cooling due to a high latent heat of evaporation.
- Greater energy efficiency.
- Up to 28% reduction in power consumption and running costs.
- Exceptionally low global warming potential.
- Better for the environment.

#### USER FRIENDLY DESIGN

- Built-in door latch for each door.
- Easy calibration through the control panel.

### Biomedical -30°C/-40°C Freezers

#### STABLE TEMPERATURE CONTROL

The MDF-U731M provides precise and uniform storage temperatures regardless of ambient conditions through microprocessor temperature control.

#### **ENERGY-SAVING OPERATION**

The specially designed compressor results in an energysaving medical freezer with superior cooling and quiet operation.

#### Microprocessor controls:

Configure temperature setpoints, alarms, monitoring, and diagnostic functions through a digital display.

### Sample storage freezer bins:

For all PHCbi -30°C & -40°C freezers a wide variety of storage solutions are available. From shelves to racks and / or bins.

#### MANUAL DEFROST

Manual defrost freezers provide stable temperature control and do not exhibit the transient temperature increases that can be associated with auto-defrost type freezers. The MDF-U731M is therefore ideal for storing your important, temperature-sensitive samples.

### STURDY CABINET CONSTRUCTION WITH SUPERIOR INSULATION

The integral foamed cabinet structure is extra strong and prevents cold air loss.

### RAPID TEMPERATURE RECOVERY MAINTAINS UNIFORMITY

The rapid pull-down speeds of PHCbi Biomedical freezers ensures that the effects of door openings are minimized. Uniform temperatures are maintained throughout the chamber through direct cooling with a full cold wall design. The inner chamber temperature offers outstanding uniformity and stability without temperature spikes.

### Inverter technology saves energy and enhances sample security

With the introduction of inverter technology, PHCbi is offering exceptional performance and energy efficiency in our latest Biomedical freezers. While conventional freezers use single speed compressors which cycle on and off, PHCbi's latest Biomedical freezers contain inverter compressors that can run at different speeds to maximise cooling performance under different conditions.

#### INVERTER TECHNOLOGY LEADS TO **COST EFFICIENCY**

The start up of a compressor is the most energy consuming part of the cycle. The ability of the inverter compressor to run at lower speeds has the advantage that the compressor will not turn off and on as often thus saving energy and reducing wear.

#### NATURAL REFRIGERANTS

Natural hydrocarbon (HC) refrigerants provide more efficient cooling due to their high latent heat of evaporation. As a result the refrigeration system offers greater energy efficiency. With an exceptionally low global warming potential, natural refrigerants are also better for the environment.

The freezers provide effective storage of life-saving vaccines and samples for diagnosis in the medical field.

#### INVERTER TECHNOLOGY LEADS TO SAMPLE SAFETY

The intelligent control of the inverter compressor optimizes running speed for the conditions. When the inverter compressor is running as normal it will stay on for longer than a conventional compressor but at a minimal speed. This reduces the power consumption and keeps freezer temperatures stable. When the door has been opened the compressor will run at maximum capacity to bring the temperature inside the freezer back down to set value quickly before resuming a normal cycle again.

### TwinGuard ULT Freezers

TwinGuard Ultra Low Temperature Freezers with Dual Cooling Technology offer the highest level of security for high-value samples. Alongside exceptional ease-of-use and data monitoring, the Dual Cooling System provides the highest level of protection through the use of two independent refrigeration systems. If one system unexpectedly fails, the other can maintain the freezer's temperature uniformly in the -70°C range. Developed for use with conventional inventory racks and boxes, the TwinGuard Series is ideal for storage of sensitive, high-value samples.

#### SCIENTIFIC APPLICATIONS

- Temperature sensitive samples such as therapeutics and biospecimens.
- Samples needing to retain viability such as stem cells, engineered tissue, organs, vaccines, hybrodmas, cancer cells or fibroblasts.
- Longitudinal study samples.
- Important medical research samples.
- Valuable pharmaceutical products.
- Clinical trial samples.
- Pathogenic samples within high security laboratories.

In the case of unexpected failure of one of the cooling circuits, the other circuit will maintain the freezer continuously in the -70°C range.

### PRESERVE SAMPLE INTEGRITY FOR BETTER END PRODUCTS

Uneven interior temperatures can lead to a loss in sample integrity. Freezers with uniform, stable temperatures and quick recovery times provide the best protection for your samples, ensuring reliable preservation while quarding against degradation.

#### FIGURE 2A - MDF-DU702VX; 9 POINT TEMPERATURE MAPPING

### -86°C ULTRA-LOW FREEZERS

(TwinGuard)

#### **DUAL COOLING SYSTEM**

Within **Twin***Guard*'s independent systems, efficient ultra-low cooling is achieved through two independent evaporator circuits surrounding the interior chamber.

#### Two independent evaporator circuits

#### FILTERLESS DESIGN

The filterless construction of the freezers reduces routine maintenance time by eliminating the need for regular cleaning of filters.

#### SUPERIOR FOOTPRINT

PHCbi ultra-low temperature freezers with spacesaving VIP insulation offer outstanding energy efficiency, whilst delivering exceptional cooling performance and durability for storing valuable research and clinical samples.

 The Dual Cooling System offers the highest level of security through the use of two independent refrigeration systems.
 If one system unexpectedly fails the other can maintain the freezer at the -70°C range.

Meeting your freezer storage needs

#### **ENHANCED USE & INTELLIGENT SECURITY**

The freezers are managed and monitored by an integrated microprocessor controller with a comprehensive alarm system and diagnostic functions. Status and control of parameters are accessible via an LCD information centre.

The EZlatch, on the upright models, makes access to stored samples even easier. A colour LCD touch panel allows full user control, even with gloved hands, while the USB port makes transferring logged data to a PC convenient.

### INDUSTRY FIRST INTELLIGENT ECO MODE OPERATION

The **Twin***Guard* series freezer can be set to Normal or ECO mode operation, depending on the requirements of the user. Although both refrigeration systems are completely independent, ECO mode establishes an overlapping cycle to significantly reduce energy consumption while maintaining optimum interior uniformity for protection of high value materials. Normal mode maintains the most repeatable, cycling wave form for the strictest of GMP applications.

LCD touch panel (MDF-DU502VX-PE and MDF-DU702VX-PE)

#### **ECO** MODE OPERATION IMAGE

#### NORMAL MODE OPERATION IMAGE

COMP A/B SIMULTANEOUS ON-OFF OPERATION

### **VIP ECO ULT Freezers**

At PHCbi, we have designed freezers that are both efficient and reliable without compromising performance. A unique heat exchanger technology decreases energy usage and makes our freezers 40% more efficient than leading competitors.

The VIP ECO Series also uses vacuum insulation panel (VIP) technology reducing wall thickness by around 50%, achieving 30% more storage capacity, and reducing the average cost per box stored. Leveraging the power of natural hydrocarbon refrigerants also allows the VIP ECO ULT freezers to use smaller compressors, due to their greater efficiency. The natural hydrocarbon refrigerants combined with VIP insulation technology also help the environment by reducing the carbon footprint with up to 40% fewer emissions.

Model: MDF-DU702VH-PE

### **VIP CHEST Freezer**

#### PRODUCT FEATURES

- Alarm lamp and buzzer offer secure warning of power failure or abnormal temperature increase.
- High and low temperature warning provides an audible and visual alarm when the temperature deviates more than ±5°C to ±20°C (adjustable) from the set point.
- Alarm ring-back function ensures the buzzer will resume operation should alarm conditions continue after it is silenced.
- Microprocessor-controlled filter-clog check function protects the refrigeration circuit.
- The rugged, one-handed outer door latch allows a padlock to be used to securely protect valuable samples.
- Control panel with digital display for easy operation.
- PHCbi's patented VIP PLUS technology has resulted in a revolutionary vacuum insulation cabinet construction that reduces wall thickness by approximately one half and achieves up to 30% more storage capacity than conventionally insulated freezers of the same footprint.
- Single compressor system achieves an approximately 40% reduction in power consumption and enables low-noise operation.

### Cryogenic Freezers

Cryogenic freezers are well-known for maintaining uniform temperatures at -150°C for the reliable, long-term preservation of cells and tissue. With thin vacuum insulation panel (VIP) walls, the MDF-C2156VAN cryogenic freezer can achieve more storage capacity than a conventionally insulated freezer without increasing footprint, while also maintaining superior temperature uniformity.

### CRYOGENIC FREEZERS PROMOTE SAMPLE STABILITY

A uniformity of +/-5°C in PHCbi mechanically refrigerated cryogenic freezers is far superior to the top-to-bottom temperature uniformity provided by liquid nitrogen vapour phase storage, without the concern of cross-contamination often associated with liquid nitrogen (liquid phase storage).

### **Liquid Nitrogen freezer** (Traditional vapour phase)

54 cm .80°C .157°C .72°C

#### Cryogenic MDF-C2156VAN

mechanically refrigerated cryogenic freezer

Comparison of temperature distribution in a liquid nitrogen freezer (vapour phase) and the MDF-C2156VAN mechanically refrigerated cryogenic freezer. The graph shows temperatures at different locations within the chamber. This data demonstrates that 100% of the MDF-C2156VAN storage space maintains uniform storage temperatures safely below -130°C, while temperature in the LN $_2$  vapour system is dependent on storage location.

### **CBS** Isothermals

The sample storage area is cooled by a liquid nitrogen jacket surrounding the stainless steel interior, and by nitrogen vapour entering the freezer from the jacket via directional vents. This patented technology provides exceptional temperature uniformity in the -190°C range, allowing the full freezer capacity to be used with confidence. The circulation of vapour within the freezer also results in less cold air loss during lid opening and improved visibility. This allows full-width lids to be used

providing quick, unrestricted access to sample racks.

With no liquid nitrogen in the storage area, samples can be stored safely in the -190°C range without the risk of cross-contamination through liquid nitrogen.

#### **KEY ADVANTAGES**

- 1) Dry storage freezer.
- 2) Unique patented liquid nitrogen jacket allows for no liquid in sample storage space and improves user safety.
- 3) Reduced exposure to room temperatures.
- 4) Superior temperature uniformity.
- 5) No risk of cross-contamination through liquid nitrogen contact.
- 6) Carousel is rotated from outside of the freezer eliminating risk of injury or temperature fluctuations.
- 7) Manufactured to ISO 13485 standards.

#### INTUITIVE OPERATION WITH LCD DISPLAY

- Easy operability with LCD display and pop up menu.
- 24-hour Clock mode and Timer mode are selectable.
- Combination of multiple programs in Join function.
- Programmable operation start date and hour.
- Operation data can be auto-recorded and graphically displayed.
- Chamber light ON-OFF control.

### METICULOUS DESIGN FOR COMFORTABLE OPERATION

The cooled incubators are crafted with a comfortable rounded corner design and offer a reversible door for a choice of left- or right-hand door opening. Low vibration setting is also available depending on the sample to be cultured (reversible door is unavailable for MIR-554).

### HIGH-PRECISION TEMPERATURE ENVIRONMENT

Model: MIR-154-PE

Wide temperature control range from -10°C to +60°C

Model: MIR-554-PF

With a wide temperature range from -10°C to +60°C, MIR Cooled Incubators allow a full range of precise experiments, culturing and storage environments.

#### Precise microprocessor temperature control

MIR Cooled Incubators incorporate a high precision microprocessor temperature control combined with a heater PID and compressor on/off system.

### IncuSafe CO<sub>2</sub> Incubators

IncuSafe CO<sub>2</sub> Incubators, with PHCbi's innovative technologies, offer outstanding quality in performance to maximise cell culture productivity and provide optimum results with reproducibility to meet the demands of todays varied cell culture applications.

Proactive contamination control is achieved through a combination of a copper-enriched stainless steel interior (inCu saFe®) and an optional ultraviolet light. The copper-enriched stainless steel interior surface combines the germicidal properties of copper and the anti-corrosive nature of stainless steel.

### CONSISTENT AND UNIFORM ENVIRONMENT FOR CELL GROWTH

PHCbi combines Direct Heat and Air Jacket heating system that surrounds the inner walls with a natural convection airflow to achieve exceptional temperature uniformity within the chamber. Combined with a dual

infrared sensor for unprecedented control over  $\mathrm{CO}_2$  gas levels, the **IncuSafe** incubator provides a stable environment for cell growth even with multiple door openings daily.

#### MCO-80IC REACH IN CO<sub>2</sub> INCUBATOR

- Large capacity, 851 litre CO<sub>2</sub> incubator with adjustable shelving provides flexibility in use.
- Accommodates roller bottle apparatus, 5 bottles wide x 7 bottles high (requires optional Mounting Ramp Kit, MCO-80RBS).
- Full view, double paned glass door allows clear observation of cultured samples.
- Large LED digital display and keypad for greater visibility and ease of set-up.

We have designed our incubators with ease of use and efficiency in mind. By delivering a user friendly cell culture incubator with rapid systems and processes PHCbi can help make your work as simple as possible.

#### MORE SPACE FOR MORE CULTURES

In a laboratory environment it is important to make the most of all the space available. With new integrated shelf supports the  ${\bf IncuSafe}$  MCO-170AIC CO<sub>2</sub> incubators provide space for up to 25% more culture vessels.\*

<sup>\*</sup> Compared to previous PHCbi 170 litre CO<sub>2</sub> incubators.

**Incu**Safe incubator design delivers exceptional ease of use, effortless maintainance, and outstanding performance with multi-level contamination control.

#### **USB PORT**

Optimise cell culture protocols and adhere to standard operating procedures by conveniently transferring data to a USB memory stick to pass on to a PC. Logged parameters include chamber temperature,  $\rm CO_2$  level, door open status and alarms.

#### INTEGRATED SHELF SUPPORTS

The MCO-170AIC, MCO-170M and MCO-230AIC incubators have less removable parts than the traditional incubators. The new interior design with integrated shelf supports makes it easier to clean which saves valuable time and reduces risk of contamination.

#### MEDICAL DEVICE DIRECTIVE

MCO-170AIC | MCO-230AIC | MCO-170M Series are certified as a Class IIa Medical Device (93/42/EEC and 2007/47/EC) for medical purposes of culturing cells, tissues,

organs and embryos.

### MCO-170M MULTIGAS INCUBATOR WITH PRECISION 0<sub>2</sub> CONTROL

The latest **Incu**Safe MCO-170M multi gas incubator offers the most precise regulation of oxygen and other gasses, while maintaining superior temperature

uniformity, contamination control, and usability.

The Dual Infra Red sensor achieves ultra-fast  $\mathrm{CO}_2$  recovery without overshoot, even following multiple door openings whilst the unique solid Zirconia  $\mathrm{O}_2$  sensor delivers precise control of physiological oxygen levels to simulate in vivo conditions.

To further prevent contamination in the incubator, PHCbi implemented a unique SafeCell ultraviolet (UV) system. SafeCell UV technology uses a programmable ultraviolet lamp that sterilises air and the humidity water pan without affecting cell cultures. It inhibits the growth of all contaminants including mycoplasma without costly HEPA filter air scrubbers which are ineffective on particles less than 0.3 microns.

# RAPID HYDROGEN PEROXIDE DECONTAMINATION REDUCES EXPERIMENTAL DOWNTIME

With PHCbi's hydrogen peroxide technology, achieve complete decontamination 8X faster than conventional high heat methods. The cycle completes in just 3 hours including the post ultraviolet conversion of  $\rm H_2O_2$  into water and oxygen for easy clean-up. This allows researchers to get back to their cell culture work the same day and allows companies to achieve faster drug discoveries.

#### ADVANCED TOUCH SCREEN

A color LCD Touch screen delivers full control over the incubator. Control can be performed with gloved hands.

# Validation & qualification SOLUTIONS

Keeping up with evolving regulations that are constantly becoming stricter can be a daunting task. When it comes to your laboratory equipment it is important to know that it will pass compliance checks and that the manufacturer has years of experience in validation training and services. PHCbi is a vertical component manufacturer that can provide turn-key solutions for validation and qualification in accordance with all current regulations and specific customer requirements and applications.

#### **Validation Solutions**

Turn key solutions available for:

- Ultra-low freezers
- Cryogenic freezers
- Medical freezers
- Pharmaceutical refrigerators
- Incubators
- Ovens
- Autoclaves
- Environmental test chambers

#### PHCbi VALIDATION SOLUTIONS

### INSTALLATION AND OPERATIONAL QUALIFICATION (IOQ)

PHCbi offers onsite validation of PHCbi manufactured equipment via Installation and Operational Protocol (IOQ).

#### 1) INSTALLATION QUALIFICATION (IQ)

Verifies and documents the equipment installation to be compliant with the manufacturer's requirements and specifications.

#### 2) OPERATIONAL QUALIFICATION (OQ)

Verifies and documents the full functional operation of the installed equipment (as specified by PHCbi or other OEM supplied equipment). Temperature performance will be mapped over a continuous 24-hr period. Data produced will be compared with manufacturer's published equipment specification. Product specific parameters such as the  $\rm CO_2/O_2$ , %RH, etc can be included within the relevant equipment IOQ protocol.

#### 3) PROCESS QUALIFICATION (PQ)

Usually conducted and performed by the end-user as the equipment will be in an environment where specific user conditions apply, i.e., the customer's actual production or product processing area. The PQ will make reference to customer specific Standard Operation Procedures documents (SOPs).

#### 4) TEMPERATURE MAPPING

Offered for customers wishing to verify actual equipment performance as installed. This is also available for non-PHCbi equipment.

#### 5) FACTORY ACCEPTANCE TESTING (FAT)

In-depth factory acceptance testing covers alarms, temperature and  $\mathrm{CO}_2$  stability, and temperature recovery. This service can be customised to SOPs.

### INSTALLATION, CALIBRATION & MAINTENANCE

In order to trace and keep an accurate record of performance of your lab equipment, a regular schedule of calibration and preventive maintenance is required. PHCbi offers the following services:

- Commissioning/Setup/Installation
- Calibration
- Onsite Protocol Execution
- Warranty response
- Factory Acceptance Testing
- Custom Validation Protocols

Installation of small inner door kit may affect usable storage capacity.
 Usable storage capacity will be 320 x 2" boxes with installation of MDF-5ID5-PW and additional shelf.
 Usable storage capacity will be 480 x 2" boxes with installation of MDF-7ID5-PW and additional shelf.
 Requires sensor cover MTR-DU700SF-PW.

### Medical Device Directive

PHCbi has become one of the first companies in our industry to introduce Medical Device certification to underline our strong commitment to product design, quality and safety.

In 2010, PHCbi was awarded certification by TÜV-Süd to manufacture blood bank refrigerators, freezers and incubators as Class IIa Medical Devices according to the directives 93/42/EEC and 2007/47/EC. At the same time our quality systems were updated to the latest ISO9001 and ISO13485 standards.

The use of refrigeration products and cell culture incubators for the preservation and cultivation of cells and tissues for human use in transfusion, regenerative medicine and cell therapy is set to expand.

In anticipation of these developing technologies and

possible changes in the regulatory landscape, PHCbi began to introduce Medical Device certified products in 2011. The first models to be certified include the:

- MDF-DU300H, MDF-U55V, MDF-DU502VH, MDF-DU702VH, MDF-DU702VX, MDF-DC502VX, MDF-DU900V-PE
- MDF-U5412H, MDF-U443
- MBR-305GR, MBR-705GR, MBR-1405GR
- MCO-170AIC, MCO-230AIC, MCO-170M

PHC Corporation, Gunma Factory is certified for:

Quality management system: ISO9001 Medical devices quality management system: ISO13485

2,3 & 4) Ambient temperature 23°C, setting 37°C, CO<sub>2</sub> 5%, O<sub>2</sub> 5%, no load
5) Nominal value

<sup>6)</sup> Requires MCO-170HB-PE, MCO-170EL-PW, MCO-HP-PW and SafeCell UV option for H<sub>2</sub>O<sub>2</sub> decontamination
7) Can only be fitted with one communications interface.

<sup>\*</sup> If stacking two incubators, make sure the double-stacking dedicated securing hardware and spacer are used.

Models: MCO-170M-PE series **SPECIFICATIONS** 

			IncuSafe Multigas incubators	
Model Number		MCO-170M-PE	MCO-170MUV-PE	MCO-170MUVH-PE
External Dimensions (W x D x H 1)	mm		620 x 710 x 905	
Internal Dimensions (W x D x H)	mm		490 x 523 x 665	
Volume	liters	161		
Net Weight	kg	79		
Performance	Kg		77	
Temperature Control Range & Fluctuation	°C		AT +5 ~ +50, ±0.1	
Temperature Uniformity 2)	°C			
		±0.25		
CO <sub>2</sub> Control Range & Fluctuation <sup>3</sup>	%	0 ~ 20, ±0.15		
O <sub>2</sub> control range & Fluctuation <sup>4)</sup>	%	1 -18 and 22 - 80, ±0.2		
Humidity Level & Fluctuation	%RH	95, ±5		
Control			<b>T</b>	
Temperature Sensor		Thermistor		
CO <sub>2</sub> Sensor		Dual IR		
O <sub>2</sub> Sensor		Stabilized Zirconia Sensor		
Display		LCD Touch Screen		
Construction				
Exterior Material			Painted Steel (rear cover not painte	
Interior Material		Stainless Steel Copper-Enriched Alloy		
Insulation Material			Extruded polystyrene	
Heating Method		Direct Heat & Air Jacket System		
Outer Door	qty	1		
Outer Door Lock	17	Optional	Optional	Standard
Field Reversible Door			Standard	
Inner Doors	qty	4 gastight - made of tempered glass		
Shelves				
Shelf Dimensions (W x D x H)	qty	3 x Stainless Steel Copper-enriched Alloy		
	mm	470 x 450 x 12		
Max. Load per Shelf	kg	7		
Max. Shelf Capacity	qty		10	
Access Port	qty	1		
Access Port Position			Rear Upper Left	
Access Port Diameter	Ømm	30		
Alarms		(R = Remot	e Alarm, V = Visual Alarm, B = Buz	zer Alarm)
Power Failure			R	
Out of Temperature Setting			V-B-R	
High Temperature		V-B-R		
Out of CO <sub>2</sub> Setting		V-B-R		
Out of $O_2$ setting		V-B-R		
Door open		V-B		
Electrical and Noise Level				
Power Supply	V		230	
Frequency	Hz	50		
Noise Level <sup>5)</sup>	dB	25		
Options	ub			
SafeCell UV System		MCO-170UVS-PE 6)	Standard	Standard
		MCO-1700VS-PE -7 MCO-170HB-PE 6)	MCO-170HB-PE 6)	
H <sub>2</sub> O <sub>2</sub> Decontamination Board		MCO-170HB-PE <sup>6)</sup>		Standard
Electric Door Lock with Password		MCU-1/UEL-PW <sup>01</sup>	MCO-170EL-PW 6)	Standard
H <sub>2</sub> O <sub>2</sub> Vapour Generator			MCO-HP-PW 6)	
H <sub>2</sub> O <sub>2</sub> Reagent, pack of 6 bottles		MCO-H202-PE		
Multiple Inner Doors		Standard		
CO <sub>2</sub> Gas Pressure Regulator		MCO-100L-PW		
N <sub>2</sub> Gas Pressure Regulator		MCO-100L-PW		
Automatic CO <sub>2</sub> Cylinder Changeover System		MCO-21GC-PW		
		MCO-SG-PW		
Semi-automatic one point Gas Calibration Kit		MC0-170ST-PW		
Semi-automatic one point Gas Calibration Kit InCu saFe® Shelf				
InCu saFe® Shelf			MCO-25ST-PW	
InCu saFe <sup>®</sup> Shelf InCu saFe <sup>®</sup> Half Tray System			MC0-25ST-PW MC0-170PS-PW	
InCu saFe® Shelf InCu saFe® Half Tray System Double Stacking Bracket*			MCO-170PS-PW	
InCu saFe <sup>®</sup> Shelf InCu saFe <sup>®</sup> Half Tray System				

<sup>1]</sup> Exterior dimensions of main cabinet only, excluding handle and other external projections 2,3 & 4) Ambient temperature 23°C, setting 37°C, CO<sub>2</sub> 5%, O<sub>2</sub> 5%, no load 5] Nominal value - Background noise 20dB 6] Requires MCO-170HB-PF, MCO-170EL-PW, MCO-HP-PW and SafeCell UV option for  $H_2O_2$  decontamination 7] Can only be fitted with one communications interface.
