# Find the right laboratory

-86°C ULT Freezers

DHCh

#### Biomedical Freezers -30°C / -40°C Freezers

#### The most uniform storage temperatures for cryopreservation solutions

Cryogenic Freezers

-150°C / -152°C Ultra-low

**Temperature Freezers** 

- No cross contamination.
- Safe and convenient usability.
- Specially designed cascade refrigeration system.
- Low operational costs.
- VIP PLUS vacuum insulation maximises storage capacity.

#### The safest ultra-low temperature freezers for the storage of high value samples

- Dual Cooling refrigeration system for ultimate sample protection.
- Intelligent 'ECO mode' operation results in lower running costs.
- Vacuum release port for improved accessibility.
- VIP PLUS vacuum insulation maximises storage capacity.

# Stable environment with extensive storage possibilities

- Low running costs.
- HC Refrigerants provide more efficient cooling due to a high latent heat of evaporation.
- Direct cooling system for uniform temperature control.
- Full-height storage containers on each shelf.
- Low environmental impact.

# equipment for your needs

#### Uniform storage temperature for the most demanding applications

- Available in a range of sizes and with swing or sliding door options.
- Excellent temperature stability and uniformity.
- Wide temperature range.
- Powerful and responsive refrigeration system.

# **Incu**Safe CO<sub>2</sub> & Multigas incubators

Incubators from 49 litres to 230 litres

#### Optimising cell culture outcomes and reproducibility

- Integrated shelf-supports.
- Full-colour LCD touch screen.
- USB port.
- Excellent control of O<sub>2</sub>, CO<sub>2</sub> and temperature.
- Dew stick prevents condensation.
- Removable, easy-to-clean, humidifying pan.
- Certified as a Class IIa Medical Device.

### Large-scale cell culture CO<sub>2</sub> Incubator

- Superior temperature and CO<sub>2</sub> control.
- Rapid recovery times.
- Exceptionally low CO<sub>2</sub> consumption rates.
- Reach-in design with large, 851-litre capacity.

851 litres

### Cryogenic Freezers

**Cryo**genic Freezers are well-known for maintaining uniform temperatures at -150°C for the reliable, long-term preservation of cells and tissues. With thin vacuum insulation panel (VIP) walls, the MDF-C2156VAN **Cryo**genic Freezer can achieve more storage capacity than a conventionally insulated freezer without increasing footprint, while also maintaining superior temperature uniformity.

#### CRYOGENIC FREEZERS PROMOTE SAMPLE STABILITY

A uniformity of +/-5°C in our mechanically refrigerated **Cryo**genic Freezers is far superior to the top-tobottom temperature uniformity provided by liquid nitrogen vapour phase storage, without the concern of crosscontamination often associated with liquid nitrogen (liquid phase storage).

#### MDF-C2156VAN

mechanically refrigerated Cryogenic Freezer

Comparison of temperature distribution in a liquid nitrogen freezer (vapour phase) and PHCbi's MDF-C2156VAN mechanically refrigerated **Cryo**genic Freezer. The graph shows temperatures at different locations within the chamber. This data demonstrates that 100% of the MDF-C2156VAN storage space maintains uniform storage temperatures safely below -130°C, while temperature in the LN<sub>2</sub> vapour system is dependent on storage location.

### **CBS** Isothermals

Model: V-5000EH AB/C

Liquid nitrogen

envelope

Vacuum

insulation

Temperature

storage area

controlled

PHCbi also offers Isothermal Carousel Liquid Nitrogen Vapor Storage system which combines the innovative -190°C isothermal design with a small opening and an interior rotating carousel. The system has a small opening which helps to reduce liquid nitrogen consumption, ensures the lid is both lightweight and user-friendly and keeps temperatures in the freezer consistently low. With improved operation and design, the system provides superior temperature uniformity for maximum sample preservation. In addition, a unique patented liquid nitrogen jacket allows samples to stay cool without coming into contact with liquid nitrogen.

Standard square rack configuration V-1500AB

#### **KEY ADVANTAGES**

- 1) Dry storage freezer.
- Unique patented liquid nitrogen jacket allows for no liquid in sample storage space and improves user safety.
- 3) Reduced exposure to room temperatures.
- 4) Superior temperature uniformity.
- 5) No risk of cross-contamination through liquid nitrogen contact.
- 6) Carousel is rotated from outside of the freezer eliminating risk of injury or temperature fluctuations.
- 7) Manufactured to ISO 13485 standards.

### TwinGuard ULT Freezers

TwinGuard Ultra Low Temperature Freezers with Dual Cooling Technology offer the highest level of security for high-value samples. Alongside exceptional ease-of-use and data monitoring, the Dual Cooling System provides the highest level of protection through the use of two independent refrigeration systems. If one system unexpectedly fails, the other can maintain the freezer's temperature uniformly in the -70°C range. Developed for use with conventional inventory racks and boxes, the TwinGuard Series is ideal for storage of sensitive, high-value samples.

#### SCIENTIFIC APPLICATIONS

- Temperature sensitive samples such as therapeutics and biospecimens.
- Samples needing to retain viability such as stem cells, engineered tissue, organs, vaccines, hybrodmas, cancer cells or fibroblasts.
- Longitudinal study samples.
- Important medical research samples.
- Valuable pharmaceutical products.
- Clinical trial samples.
- Pathogenic samples within high security laboratories.

#### PRESERVE SAMPLE INTEGRITY FOR BETTER END PRODUCTS

Uneven interior temperatures can lead to a loss in sample integrity. Freezers with uniform, stable temperatures and quick recovery times provide the best protection for your samples, ensuring reliable preservation while guarding against degradation.

FIGURE 2A - MDF-DU702VX; 9 POINT TEMPERATURE MAPPING

-86°C ULTRA-LOW FREEZERS

#### DUAL COOLING SYSTEM

Within **Twin***Guard*'s refrigeration system, efficient ultralow cooling is achieved through two independent evaporator circuits surrounding the interior chamber.

#### Two independent evaporator circuits

-86°C

 The Dual Cooling System offers the highest level of security through the use of two independent refrigeration systems. If one system unexpectedly fails the other can maintain the freezer at the -70°C range.

#### ENHANCED USE & INTELLIGENT SECURITY

The freezers are managed and monitored by an integrated microprocessor controller with a comprehensive alarm system and diagnostic functions. Status and control of parameters are accessible via an LCD information centre.

The EZlatch, on the upright models, makes access to stored samples even easier. A colour LCD touch panel allows full user control, even with gloved hands, while the USB port makes transferring logged data to a PC convenient.

#### FILTERLESS DESIGN

The filterless construction of the freezers reduces routine maintenance time by eliminating the need for regular cleaning of filters.

#### SUPERIOR FOOTPRINT

**Twin***Guard* Ultra-Low Temperature Freezers with space-saving VIP insulation deliver exceptional cooling performance and durability for storing valuable research and clinical samples.

Dual Cooling System Upright freezers

### **VIP ECO** ULT Freezers

VIP ECO Ultra Low Temperature Freezers with natural refrigerants minimise energy consumption, reduce environmental impact and save money. Innovative technology and Class IIa Medical Device Certification provide secure storage of valuable research and clinical samples. The VIP vacuum insulation ensures an optimal footprint to storage capacity ratio.

The **VIP ECO** ULT Freezers use vacuum insulation panel (VIP) technology reducing wall thickness by around 50%, achieving 30% more storage capacity, and reducing the average cost per box stored. Leveraging the power of natural hydrocarbon refrigerants also allows the **VIP ECO** ULT Freezers to use smaller compressors, and reduce energy consumption. The natural hydrocarbon refrigerants combined with VIP insulation technology also help the environment by reducing the carbon footprint with up to 40% fewer emissions.

MDF-DU502VH and MDF-DU702VH Freezers are certified as a Class IIa Medical Device (93/42/EEC and 2007/47/EC) for medical purposes of storing cells, tissues, organs and embryos.

#### REDUCED RUNNING COSTS

**VIP ECO** Ultra Low Temperature Freezers, with reduced power consumption, have the benefit of much lower running costs. They also dissipate less heat, reducing air conditioning requirements for further cost savings.

- Model MDF-DU702VH-PE (728 litres) compared to MDF-U73V at set value -80°C, 23°C ambient, no load, 230V 50Hz, € 0.12/kWh. Actual energy use and savings will depend on operating conditions and price of electricity paid.
   Model MDF-DU502VH-PE
- 2) Model MDF-DS02VH-PE [526 litres] compared to MDF-U53V at set value -80°C, 23°C ambient, no load, 230V 50Hz, € 0.12/kWh. Actual energy use and savings will depend on operating conditions and price of electricity paid.

MDF-DU502VH up to **55%** more efficient MDF-DU702VH up to **46%** more efficient

\*MDF-DU702VH compared to existing PHCbi models of equivalent size.

Model: MDF-DU702VH-PE

#### EXTREMELY LOW ENVIRONMENTAL IMPACT

Naturally occurring hydrocarbon (HC) refrigerants used within the **VIP ECO** ULT Freezers are non ozone depleting, have short atmospheric lifetimes and have extremely low global warming potentials (GWP's). This makes the freezers very environmentally friendly so they are an ideal solution for complying with objectives for reduced carbon footprints.

### **VIP** ULT Freezers

**VIP** ULT Freezers represent an industry leading combination of refrigeration, control, alarm, monitoring and accessibility for reliable sample preservation.

#### HIGHEST BOX CAPACITY

The use of highly efficient VIP PLUS insulation optimizes interior volume in the smallest footprint possible. This ensures the most efficient use of space for up to 40%\* more 2" box storage capacity within the same footprint.

\*MDF-DU900V-PE compared with PHCbi model with an equivalent footprint

#### WHICH FREEZER WILL YOU CHOOSE?

Conventional Freezer VIP ULT Freezer With VIP Insulation

#### EZlatch

The EZLatch door handle on the MDF-DU900V makes access to stored samples even easier. Designed to open with minimal effort and repeatedly stress tested to ensure endurance.

11

### **Biomedical** -30°/-40°C Freezers

#### HIGH PERFORMANCE FREEZERS WITH OPTIMAL TEMPERATURE UNIFORMITY

The Biomedical Freezers are designed for long or intermediate-term storage at temperatures as low as -40°C. Constructed with time-tested laboratory and clinical-grade refrigeration systems, these freezers are ideal for the storage of a wide variety of samples including enzymes, biologics and medicines.

#### RAPID TEMPERATURE RECOVERY MAINTAINS UNIFORMITY

The rapid pull-down speeds of our Biomedical Freezers ensures that the effects of door openings are minimized. Uniform temperatures are maintained throughout the chamber through direct cooling. The inner chamber temperature offers outstanding uniformity and stability without temperature spikes.

Microprocessor controls: Configure temperature set-

points, alarms, monitoring, and diagnostic functions

through a digital display.

freezer bins: For all -30°C & -40°C freezers a wide variety of storage solutions are available. From shelves to racks and / or bins.

Sample storage

### **MPR** Pharmaceutical Refrigerators

#### MPR PHARMACEUTICAL REFRIGERATORS OFFER A COMPLETE SOLUTION FOR THE MOST DEMANDING REQUIREMENTS FOR STORAGE OF PHARMACEUTICALS, MEDICINES, VACCINES, AND OTHER TEMPERATURE-SENSITIVE APPLICATIONS.

### **IncuSafe** CO<sub>2</sub> & Multigas Incubators

**Incu**Safe CO<sub>2</sub> & Multigas Incubators, with innovative technologies, offer outstanding quality in performance to maximise cell culture productivity and provide optimum results with reproducibility to meet the demands of todays varied cell culture applications.

#### ACTIVE BACKGROUND DECONTAMINATION

During cell culture, inCu-saFe and SafeCell UV actively prevent contamination The exclusive inCu-saFe copperenriched stainless steel alloy interior offers the germicidal properties of copper and the durability of stainless steel. The optional, isolated, SafeCell UV lamp decontaminates circulating air and water in the humidifying pan, without harming cultured cells.

#### ULTRAVIOLET LIGHT AND COPPER-ENRICHED STAINLESS STEEL INTERIOR REDUCE THE CHANCE OF CONTAMINATION

To further prevent contamination in the incubator, PHCbi implemented a unique SafeCell ultraviolet (UV) system. SafeCell UV technology uses a programmable ultraviolet lamp that sterilises air and the humidity water pan without affecting cell cultures. It inhibits the growth of all contaminants including mycoplasma without costly HEPA filter air scrubbers which are ineffective on particles less than 0.3 microns.

#### CONSISTENT AND UNIFORM ENVIRONMENT FOR CELL GROWTH

**IncuSafe**  $CO_2$  & Multigas Incubators combines a Direct Heat System with an Air jacket heating system that surrounds the inner walls with a natural convection airflow to achieve exceptional temperature uniformity within the chamber. Combined with a dual infrared sensor for unprecedented control over  $CO_2$  gas levels, the incubator provides a stable environment for cell growth even with multiple door openings daily.

The single beam, dual detector IR CO<sub>2</sub> sensor offers continuous calibration for excellent control, accuracy and stability. The sensor simultaneously measures sample and reference wavelengths for continuous auto-zero calibration. The ceramic-based sensor is unaffected by moderate changes in temperature and relative humidity and is linked to the P.I.D. controller for fast recovery times.

#### ZIRCONIA O2 SENSOR

The more  $O_2$  passes through the Zirconia sensor, the more electrical current is induced. This creates a signal to inject more  $N_2$ , for when samples require low oxygen levels or to inject more  $O_2$  for when samples require elevated oxygen levels.

**Incu**Safe Incubators are designed with ease of use and efficiency in mind. By delivering a user friendly cell culture incubator with responsive systems and processes we can help make your work as simple as possible.

#### MORE SPACE FOR MORE CULTURES

In a laboratory environment it is important to make the most of all the space available. With integrated shelf supports the **IncuSafe** MCO-170AIC CO<sub>2</sub> incubators provide space for up to 25% more culture vessels.\*

\* Compared to previous 170 litre CO<sub>2</sub> incubators.

The **Incu**Safe Incubator design delivers exceptional ease of use, effortless maintainance, and outstanding performance with multi-level contamination control.

#### USB PORT

Optimise cell culture protocols and adhere to standard operating procedures by conveniently transferring data to a USB memory stick to pass on to a PC. Logged parameters include chamber temperature, CO<sub>2</sub> level, O<sub>2</sub> level, door open status and alarms.

#### INTEGRATED SHELF SUPPORTS

The MCO-170AIC, MCO-230AIC and MCO-170M incubators have less removable parts than the traditional incubators. The interior design with integrated shelf supports makes it easier to clean which saves valuable time and reduces the risk of contamination.

#### MEDICAL DEVICE DIRECTIVE

MCO-170AIC | MCO-230AIC | MCO-170M Series are certified as a Class IIa Medical Device (93/42/EEC and 2007/47/EC) for medical purposes of culturing cells, tissues, organs and embryos.

### IncuSafe MCO-80IC REACH-IN INCUBATOR

Sometimes your pharmaceutical research may call for large scale processing. With the **Incu**Safe MCO-80IC large scale reach-in incubator, take your cell culture needs to greater levels by growing more cell lines at once. Improved decontamination technologies (24/7 Active Background Decontamination control with optional UV light) and CO<sub>2</sub> and temperature sensors allow for faster turnaround and higher cell yield.

Model: MCO-80IC-PE

### MIR Heated and Cooled Incubators

Quality control and testing is an important aspect of pharmaceutical development. With our heated and cooled incubators, achieve optimal temperature configuration for a variety of protocols, including QA / QC, microbiology and stability conditioning.

#### Models:

MIR-163H-PE | MIR-263H-PE MIR-154-PE | MIR-254-PE | MIR-554-PE

Model: MIR-554-PE

## Validation & qualification SOLUTIONS

Keeping up with evolving regulations that are constantly becoming stricter can be a daunting task. When it comes to your laboratory equipment it is important to know that it will pass compliance checks and that the manufacturer has years of experience in validation training and services. PHCbi is a vertical component manufacturer that can provide turn-key solutions for validation and qualification in accordance with all current regulations and specific customer requirements and applications.

#### **Validation Solutions**

#### Turn key solutions available for:

- Ultra-Low Freezers
- **Cryo**genic Freezers
- Medical Freezers
- Pharmaceutical refrigerators
- Incubators
- Ovens
- Autoclaves
- Environmental test chambers

#### PHCbi VALIDATION SOLUTIONS

### INSTALLATION AND OPERATIONAL QUALIFICATION (IOQ)

PHCbi offers onsite validation of PHCbi manufactured equipment via Installation and Operational Protocol (IOQ).

#### 1) INSTALLATION QUALIFICATION (IQ)

Verifies and documents the equipment installation to be compliant with the manufacturer's requirements and specifications.

#### 2) OPERATIONAL QUALIFICATION (OQ)

Verifies and documents the full functional operation of the installed equipment (as specified by PHCbi or other OEM supplied equipment). Temperature performance will be mapped over a continuous 24-hr period. Data produced will be compared with manufacturer's published equipment specification. Product specific parameters such as the  $CO_2/O_2$ , %RH, etc can be included within the relevant equipment IOQ protocol.

#### 3) PROCESS QUALIFICATION (PQ)

Usually conducted and performed by the end-user as the equipment will be in an environment where specific user conditions apply, i.e., the customer's actual production or product processing area. The PQ will make reference to customer specific Standard Operation Procedures documents (SOPs).

#### 4) TEMPERATURE MAPPING

Offered for customers wishing to verify actual equipment performance as installed. This is also available for non-PHCbi equipment.

#### 5) FACTORY ACCEPTANCE TESTING (FAT)

In-depth factory acceptance testing covers alarms, temperature and  $CO_2$  stability, and temperature recovery. This service can be customised to SOPs.

#### THERMAL VALIDATION

We also provide a thermal validation solution specifically designed to conform with new FDA data security guidelines (21 CFR Part 11) and meet international and European cGMP requirements for inspection of pharmaceutical, biotechnology, and medical device (EN285, EN554), manufacturing.

### INSTALLATION, CALIBRATION & MAINTENANCE

In order to trace and keep an accurate record of performance of your lab equipment, a regular schedule of calibration and preventive maintenance is required. PHCbi offers the following services:

- Commissioning/Setup/Installation
- Calibration
- Onsite Protocol Execution
- Warranty response
- Factory Acceptance Testing
- Custom Validation Protocols

### Medical Device Directive

PHCbi has become one of the first companies in our industry to introduce Medical Device certification to underline our strong commitment to product design,

quality and safety.

In 2010, PHCbi was awarded certification by TÜV-Süd to manufacture blood bank refrigerators, freezers and incubators as Class IIa Medical Devices according to the directives 93/42/EEC and 2007/47/EC. At the same time our quality systems were updated to the latest ISO9001 and ISO13485 standards.

The use of refrigeration products and cell culture incubators for the preservation and cultivation of cells and tissues for human use in transfusion, regenerative medicine and cell therapy is set to expand. In anticipation of these developing technologies and possible changes in the regulatory landscape, PHCbi began to introduce Medical Device certified products in 2011. The first models to be certified include the:

- MDF-DU300H, MDF-U55V, MDF-DU502VH, MDF-DU702VH, MDF-U702VX, MDF-DC502VX, MDF-DC700VX, MDF-DU900V-PE
- MDF-U5412H, MDF-U443
- MBR-305GR, MBR-705GR, MBR-1405GR
- MCO-170AIC, MCO-230AIC, MCO-170M

PHC Corporation, Gunma Factory is certified for: Quality management system: ISO9001 Medical devices quality management system: ISO13485

3) Max. load is the total of the load distributed over all shelves (3) and chamber bottom surface. The weight is the maximum load for chamber inside and excludes load on casters equipped with product.
4) Nominal value. Background noise 20dB

<sup>Notes:
1) Exterior dimensions of main cabinet only, excluding handle and other external projections - See dimensions drawings on website for full details
2) Air temperature measured at freezer centre, ambient temperature +30°C, no load</sup>

1) Exterior dimensions of main cabinet only, excluding handle and other external projections 2,3 & 4) Ambient temperature 23°C, setting 37°C, CO<sub>2</sub> 5%, O<sub>2</sub> 5%, no load 5) Nominal value

6) Requires MC0-170HB-PE, MC0-170EL-PW, MC0-HP-PW and SafeCell UV option for H<sub>2</sub>O<sub>2</sub> decontamination
 7) Can only be fitted with one communications interface.

#### SPECIFICATIONS MIR HEATED INCUBATORS

		MIR Heated Incubators				
Model Number		MIR-H163-PE	MIR-H263-PE			
External Dimensions (W x D x H 1)	mm	580 x 595 x 820	730 x 645 x 870			
Internal Dimensions (W x D x H)	mm	450 x 460 x 450	600 x 510 x 500			
Volume	liters	93	153			
Net Weight	kg	50	67			
Performance						
Temperature control range		Ambient temp +5 ~ +80				
Fluctuation		±0.2 (<-60) ~ ± 0.5 (60 ~ 80)				
Temperature uniformity		±1				
Control						
Temperature sensor		Thermistor				
Display		LED				
Construction						
Exterior material		Painted steel				
Interior material		SS SUS-304				
Insulation material		Glass fibre				
Outer door	qty	1				
Inner door	qty	1				
Shelves	qty	2	3			
Max. load per shelf	kg	15	15			
Max. total load	kg	30	30			
Alarms		(R = Remote Alarm, V = Visual Alarm, B = Buzzer Alarm)				
Out of temperature setting		V-B				
High temperature		V-B				
Electrical and Noise Level						
Power Supply	V	230				
Frequency	Hz	50				

Notes: 1) Exterior dimensions of main cabinet only, excluding handle and other external projections - See dimensions drawings on website for full details

Appearance and specifications are subject to change without notice.

#### **SPECIFICATIONS MIR COOLED INCUBATORS**

			MIR Cooled Incubators		
Model Number		MIR-154-PE	MIR-254-PE	MIR-554-PE	
External Dimensions (W x D x H 1)	mm	700 x 580 x 1018	700 x 580 x 1618	800 x 832 x 1810	
Internal Dimensions (W x D x H)	mm	620 x 368 x 555	620 x 368 x 1088	640 x 550 x 1160	
Volume	liters	123	238	406	
Net Weight	kg	78	108	195	
Performance					
Temp control range and fluctuation	°C	-10 ~ +60 (AT; +5 ~ +35, no load), ±0.2 with Heater PID control (SV 50), ±1.5 with Compressor control (SV 5) PID control: 7°C above AT for MIR-154/254; 10°C above AT for MIR-554			
Temperature uniformity	°C	±0.5 SV (35)			
Performance ambient temperature	°C	20, no load			
Control					
Temperature Sensor			Thermistor		
Refrigeration					
Insulation material			PUF		
Insulation thickness	mm	40	40	80	
Compressor		150	250	250	
Refrigerant		R-134a	R-404A	R-404A	
Cooling method		Forced air circulation			
Construction					
Exterior material			Painted steel		
Interior material		SS SUS-304			
Outer door	qty	1			
Outer door lock			MIR-LP option	Y	
Reversible door		Y	Y	N	
Inner door	qty	N	N	2 small inner doors (MIR-55ID option) MIR-LP optior	
Shelves	qty	3	5	5	
Max. load per shelf	kg	20	20	50	
Max. total load	kg	61	100	250	
Access port	qty	1	1	2	
- position		left side	left side	left and right side	
- diameter	Ømm		40		
Interior fluorescent lamp		1, 15, with MIR-L15-PE 2) option			
Alarms		(R = Remote Alarm, V = Visual Alarm, B = Buzzer Alarm)			
Power failure		-	-	R	
High temperature		V-B-R			
Low temperature		V-B-R			
Door open		V-B			
Electrical and noise level					
Power supply			230		
Frequency		50			
Noise level <sup>3)</sup>		41	44	45	
Options					
Stacking kit		MIR-S154SB-PW	_	_	
Door padlock bracket		MIR-LP-PW	MIR-LP-PW		
Additional illumination kit		MIR-L15-PE	MIR-L15-PE	 MIR-L15-PE	
Inner doors			-	MIR-55ID-PW	
Door window blanking plate		- MIR-154BP-PW	MIR-254BP-PW	-	
Door window blanking plate		MIR-1340F-FW	MIR-204DF-FW	-	

Notes: 1) Exterior dimensions of main cabinet only, excluding handle and other external projections - See dimensions drawings on website for full details 2) MIR-L15-PE operates between +2°C and +50°C 3) Nominal value. Background noise 20dB

Appearance and specifications are subject to change without notice.
